How to share your screen on a display

for guest users.

1

If you see this image on your classroom display follow the steps below to share your computer screen.

Press the switch input button (⇥) on the remote.

2

This screen appears when the switch input button is pressed.

Use the d-pad and the orange button to select HDMI 1 to display the connected device.

You can now conduct your lessons the way you normally would.

MERLYN MIND™

Note: to use Merlyn to control your browser with voice or remote, ensure the Merlyn Mind Chrome Extension in running and that you are logged into the Merlyn Mind Desktop App, and your laptop is paired.
